Want to become a professional race driver? Join Allied-Racing Junior Education! Requests welcome!

We at Allied-Racing are specialists in developing young professional drivers. Climbing up the ladder of professional motorsports, the young drivers at the age of 14-16 years stay in karting and get an Off-Championship Junior Education. In preparation to compete in prestigious GT4 Series in 2025, the participants start their Junior Education with up to 12 test days in a Porsche 718 Cayman GT4 being supervised by a personal engineer. In a tailor made workshop, a maximum of 4 drivers will learn the technique of the race car, to read data properly, to use the simulator as an efficient training tool, and to better promote themselves in a media training.

@vincent\_andronaco\_offical is our proof of concept.

At the age of 16, the drivers join the Allied-Racing Junior Academy and compete in GT4 Championships. Thereafter, the drivers are ready to move on into Cup Racing as Young Professionals. As the History of Factory Drivers proves: Professional Championships and Porsche One-Make Series like Porsche Carrera Cup Deutschland or Porsche Mobil 1 Supercup provide perfect platforms for semi-professional/professional Racing Drivers to become Factory Drivers.

Young Drivers with Pre-Experience in GT Racing will directly join the Allied-Racing Junior Academy.

The Allied-Racing Junior Concept is the best Junior Programme available in GT Motorsports to become a semi-pro/pro Race Driver. Not at least @BastianBuus and @Joel Sturm as being Drivers of the first Allied-Racing Junior Academy Cohort in 2020.
